NICOLÁS CUTCLIFFE SÁNCHEZ

AUTOMOTIVE ENGINEERING STUDENT

CONTACT

nicolas.cutcliffe@gmail.com
(+33) 6 27 07 19 19

Ruel Malmaison, France 92500

SKILLS

Python: Capable of coding autonomous robots, using artificial intelligence.

Matlab/ Matlab Simulink Simulating and developing functional vehicle and robot models.

Solidworks /Catia: Capable of making accurate 3D representations. / Creating technical drawings. / Simulating behaviour of materials.

Gantt Organising team work.

SciLab / LabView: Simulation of a complete system through physics and mathematics.

C & C++ Capable of solving equations and problems through C language.

IPG CarMaker Integration, testing and validation of ADAS systems.

OTHER

- Driving License - B

OBJECTIVE

Engineering student interested in AD/ADAS, artificial intelligence and electric vehicles searching for a fifth-year engineering internship (January 2024 - June 2024).

LANGUAGES

Language	Spanish	English	French	German
Level	NATIVE - C2	NATIVE - C2	NATIVE - C2	BASIC - A1

*All the levels have been evaluated by the CEFR (Common European Framework of Reference languages. Language skills/qualifications assessment tool).

EXPERIENCE

- **R&D AD/ADAS Engineering intern - Toyota Motor Europe:** **July - December 2022**

Brussels, Belgium.
Development of autonomous test and validation algorithms through Python.
Analysis of car data from real road conditions.

- **Service operator - Stellantis Group:** **January - February 2021**

Poissy, France.
Discovering how a production line works, and the different ways to organize it.
ECU programming.
Exterior and Interior quality control.
Installing essential safety elements.

- **Apprenticeship in Materials Engineering - Bright Lite Structures:** **June 2017**

Stamford, England.
Design and manufacturing of carbon fibre pieces.
Readying the base materials for manufacturing.
Research and Development.

- **Apprenticeship - Alstom Transport France:** **March 2016**

Saint Ouen, France.
Discovering the work of an engineer.
Creating and modifying databases.
Developing systems and layouts to help improve train capacity.

EDUCATION

- **Institut Supérieur de l'Automobile et des Transports (ISAT):**

Nevers, France. **2019-Current**
Automotive engineering school.
Specialising in Electronics and Autonomous Systems
Part of Isat Electric Rally Car project.

- **La Salle Passy Buzenval - Baccalauréat Scientifique:** **2017-2019**

Rueil Malmaison, France
Engineering Science
